## Activity 3: Word search puzzle: safety gear

This word search puzzle will test students' knowledge of the names of common safety gear. It would make a great review after completion of any of the safety gear activities in this chapter.

### Getting started

Photocopy and hand out the word search puzzle on the next page and ask students to find the names of different safety gear.

This could be done as an individual assignment or as a group activity.

Be sure students read the instructions carefully. The words they will find can be read forwards, backwards or diagonally.
