Course Expectations Regarding Occupational Health and Safety (OHS)

General Considerations for Program Planning: Health and Safety

In family studies courses, when students are preparing foods or are involved in other practical activities, teachers must take particular care to ensure that safety requirements are met and that safety procedures are followed. Students must be made aware of any health or safety hazards that might be connected with the activities in which they are engaged, and must be coached in the proper use of safety equipment, such as fire extinguishers.

	MINISTRY OF EDUCATION COURSE EXPECTATIONS	<i>LIVE SAFE! WORK SMART!</i>	
		MODULE	SECTION & PAGE
Grade 9 / 10			
Food and Nutrition Grade 9 or 10, Open (HFN10/HFN20)
