

Electrical safety diary

How many times a day do you use electricity? There could be a hazard each time you do. Keep a diary for one day right from when you wake up until you go to bed. Use the “Dangerous things to look for” checklist to remind you of hazards to look for and make a list of any you find.

Time	What electrical thing did you use?	Did you see anything dangerous? If yes, what?	GO. Be safe.	STOP and ask.	Who should you tell about the dangerous situation?
<i>(example)</i> 7 a.m.	<i>Alarm clock</i>	<i>Too many cords plugged in the outlet</i>	<i>No</i>	<i>Yes</i>	<i>Parents</i>
